DETAILED ACTION

Response to Arguments

1. Applicant's arguments filed April 6, 2005 have been fully considered but they are not persuasive.

In re pages 6-8, applicants argue that claims 31 and 35 recite that the recording medium comprises a recording layer and a transport stream recorded on the recording layer, thereby providing more structural claim limitations, i.e., the transport stream physically tied to a structure being a recording layer of the recording medium, claims 31 and 35 recite that the transport stream includes navigation information "used to manage" subsequent transport packets (claim 31) or the at least one data packet (claim 35 and managing transport/data packet(s) is directed to the functional aspects of the data structure and imparts functionality to the data structure, and claims 31 and 35 also recite that the navigation information includes "program clock references (PCR) information for controlling timing associated with the transport stream" and controlling taxiing associated with the transport stream imparts functionality to the data structure embodied on the machine-readable medium, thereby rendering the claims as statutory.

In response, the examiner respectfully disagrees. The claimed "navigation information" and "program clock reference" recited in claims 31 and 35 are **capable** to manage the transport stream and **capable** to control timing associated with the transport stream. The claimed "navigation information" and "program clock reference" **do not actually manage** the transport stream and **control** timing associated with the transport stream. Since the claimed "navigation information" and "program clock

reference” **do not manage** the transport stream and **control** timing associated with the transport stream, they are considered to be nonfunctional descriptive material.

Claim Rejections - 35 USC § 101

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

3. Claims 31-39, as set forth in the last Office Action, are rejected under 35 U.S.C. 101 because claims 31-39 are directed to a recording medium storing transport stream being composed of one or more predetermined units. Data structures not claimed as embodied in computer-readable media are descriptive material per se and are not statutory because they are neither physical “things” nor statutory processes. see, e.g., *Warmerdam*, 33 F.3d at 1361, 31 USPQ2d at 1760 (claim to a data structure per se held nonstatutory) and merely claiming nonfunctional descriptive material stored in a computer-readable medium does not make it statutory. See MPEG 2106.IV.B.1.

Allowable Subject Matter

4. Claims 22-30 are allowed.

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

Art Unit: 2616

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
